- I understand that if the groomer cannot contact me to confirm instructions; they will groom my dog according to the description I provided above to the best of their ability
- In cases of extreme anxiety, aggression, or severe matting, sedation may be recommended for the pet's safety and comfort.
- If the pet's fur is severely matted, it may require extra time and care to detangle or trim. Matting can cause discomfort, skin irritation, or infection if not addressed.
- Owners MUST inform us if your pet bites, has bitten, or is aggressive. We reserve the right to refuse or stop services for your pet at any time, and charge an aggressive dog fee in addition to any regular fees. In extreme cases, sedation may be recommended for the pet's safety and comfort

### **Fleas and Ticks:**

Flea infestation can lead to tapeworm and other health problems. If fleas are found during the duration of your pet(s) stay or grooming process, we will give your pet an oral tablet called a Capstar for an additional charge added to your bill. The pill will kill the fleas on your pet as well as keeping our facility flea-free. Ticks found will be removed for an additional charge. Please remember that parasites are a hazard to your pet as well as humans.
